

Evaluation of Ideal Candidate Description Qualities

Introduction

Candidates for the Board of Directors are evaluated (rated) on a number of categories (qualities) that the Board believes are useful indicators of aptitude in preparation for the role of a PASS Director. None of the categories in the ideal description are mandatory. The mandatory requirements are listed in the [PASS Board Elections Overview](#) document. The 2018 NomCom rates candidates against the ideal description from both their application and interview to determine how well suited they are to serve as a PASS Director.

The rating scale is: Weak (1), Acceptable (2), Strong (3), or Very Strong (4). An aggregate score for each category for each candidate will be published during the elections campaign period. This published score will give the community insight into the strengths of each candidate based on the NomCom's evaluation of their application and interview.
