

PASS VIRTUAL SUMMIT 2020

Technology Focuses

- Advanced Analytics
- Application Development
- Artificial Intelligence
- Big Data
- Business Intelligence and Data Warehousing
- Cloud Solutions
- Data Governance/Privacy
- Data Platform Strategy
- Database Administration
- Development
- DevOps
- Hybrid Infrastructure
- Professional Development (Other)
- Security

Tags

- .Net

- C#
- Cassandra
- Cloud
- Cognitive Services

- Columnstore
- Containers
- Cortana
- CosmosDB
- Databricks
- Data Architecture
- Data Cleansing
- Data Mining
- Data Science
- Data Warehousing
- Database Administration
- Database Modelling
- DAX
- Deployment
- Design
- DevOps
- Disaster Recovery
- Docker
- Entity Framework
- ETL
- Excel
- Hadoop
- Hardware Virtualization
- High Availability
- High Availability and Disaster Recovery
- Implementation
- InMemory
- Indexing
- IoT
- JavaScript
- JSON
- Linux
- Machine Learning
- Migration
- MongoDB
- MySQL
- NoSQL
- Open Source
- Optimization
- Oracle
- Performance
- Power BI
- PowerShell
- Predictive Analytics
- Professional Development
- Python
- Qlik
- Query Store
- R
- Reporting Services
- Requirements Gathering
- Scalability
- Security
- Spark
- SQLServer 2008
- SQLServer 2012
- SQLServer 2014
- SQLServer 2016
- SQLServer 2017
- SQLServer 2019
- SSAS
- SSIS
- SSRS
- Storytelling
- Tableau
- Troubleshooting
- T-SQL
- VB.net
- Virtualization
